# **Quarterly Statistics**

## **September 2007**

Hospital Treatment Table

General Treatment Table

## **Introduction**

This quarterly PHIAC publication, for the September quarter 2007, shows the number of policies and insured persons covered by private health insurance for hospital treatment and general treatment and the proportion of the population these insured persons represent. Also in this publication are graphs and notes about the statistics.

From the June 2007 report some definitions have changed for some items. See notes (a), (f),(g), (m) and (n), at the end of this report for explanation of the changes.

## **The Statistics**

**Hospital Treatment adjusted for Gold Card:** PHIAC compiles a Hospital Treatment Table, adjusted for Department of Veterans Affairs Gold Card coverage. Those persons are unlikely to also hold private health insurance and the Australian population base eligible to take out private health insurance has been adjusted accordingly. This table shows that after the adjustment is applied, 44.5% of the population had private hospital cover at 30 September 2007.

State	New South Wales	Victoria	Queensland	South Australia	Western Australia	Tasmania	Northern Territory	Australia
Percentage of population	45.9%	43.3%	41.8%	44.7%	49.2%	43.5%	33.1%	44.5%

**Hospital Treatment:** At 30 September 2007, 44.0% of the Australian population was covered by Hospital Treatment cover. There was an increase in the percentage of the population covered, compared to the June 2007 quarter, of 0.5 percentage points.

State	New South Wales	Victoria	Queensland	South Australia	Western Australia	Tasmania	Northern Territory	Australia
Percentage of population	45.5%	42.9%	41.3%	44.2%	48.7%	42.8%	33.0%	44.0%
Percentage Points Change	0.5%	0.5%	0.5%	0.3%	0.9%	0.3%	0.7%	0.5%

There was an increase in coverage of 147,598 insured persons in the September 2007 quarter, following increases in the previous eight quarters. There was an increase of 39,413 single policies and an increase of 34,368 family policies. There was a net increase of 73,781 hospital policies.

**General Treatment:** Changes in coverage of General Treatment should be viewed with caution. In the June 2007 quarter there was a break in the series with a change in classification of policies as a result of the Private Health Insurance Act 2007. In many cases policies previously classified as hospital treatment only policies have been reclassified as combined hospital treatment and general treatment policies. This reclassification has caused an artificial increase in policies including general treatment in the June 2007 quarter. In the September 2007 quarter there was an increase in the General Treatment coverage of 156,687 persons increasing by 0.3 percentage points to 46.9% of the population.

Included in this publication are data and graphs showing the age distribution of insured persons with General Treatment cover. The distribution of these insured persons is similar to the distribution of insured persons with Hospital Treatment cover.

**Age Distribution:** Changes in insured persons by age cohort in the September 2007 quarter showed increases in all persons. The largest increases were for insured persons aged 20 to 39 and 60 to 64. The increase in the 60 to 64 age cohort is largely due to insured persons ageing and moving up from the 50 to 59 age cohort.

**Lifetime Health Cover:** The majority of adults with hospital cover (91.5%) have a certified age of entry of 30, with no penalty loading. However, the proportion of adults with hospital cover paying a loading has increased every quarter since the introduction of Lifetime Health Cover. At the end of the September 2007 quarter the percentage of adults paying a loading was 8.5%. At 30 September 2007 there were 566,939 persons with a certified age of entry more than 30 and subject to the Lifetime Health Cover loading; a net increase in persons paying a penalty over the year of 158,737. There was a net increase in persons with a certified age of entry of 30 (with no penalty) over the year of 104,910.

Please contact PHIAC if you have any questions about these statistics.
